11. Sleep Timer
12. Long-Form Audio
13. Settings
14. Accessibility & Haptics
15. Supported File Formats
16. Troubleshooting

1. Getting Started

First Launch

A brief onboarding walkthrough introduces the app's three pillars: zero-copy file access, studio-grade EQ, and full playback management.

Importing Files

1. Tap **+** in the Library and choose **Import Files** or **Import Folder**
2. Select audio files or a folder from iCloud Drive, On My iPhone, or any connected storage
3. SAB Audio reads metadata and adds tracks to your library

No files are copied. SAB Audio references files in place. Folder import recursively scans all subfolders.

2. Playing Music

Now Playing Screen

- **Album Artwork** with dynamic blurred background
- **Queue Source** chip shows origin (Library, Playlist, Search, Session)
- **Progress Scrubber** with draggable playhead
- **Playback Controls**: Shuffle, Skip Back, Play/Pause, Skip Forward, Repeat
- **Volume Slider**

Feature Grid

Button	Function
Queue	View and manage current queue
Previous / Next	Track navigation
EQ	10-band parametric equalizer
Speed	Playback speed (0.5x-2.0x)
Sleep	Sleep timer with custom duration
AirPlay	Choose audio output device
Bookmarks	Position bookmarks for current track

Crossfade

Dual-deck engine crossfades between tracks. Configure duration (1-12s) in Settings.

Background & Lock Screen

- Continues playing when device is locked or app is backgrounded
 - Lock Screen, Control Center, and headphone controls supported
-

3. Library Management

Smart Collections

- Continue Listening, Recently Added, Recently Played, Most Played
- Needs Attention (file issues), Potential Duplicates

Browsing

Segment	Shows
All	All tracks + smart collections
Favorites	Favorited tracks
Artists	Grouped by artist
Albums	Grouped by album

Track Actions

- **Swipe left:** Queue, Delete
- **Swipe right:** Favorite, Add to Playlist
- **Long-press:** Play Next, Play Later, Add to End of Queue

File Link Status

Status	Meaning
Available	Ready to play
Needs Download	In iCloud, not yet downloaded
Missing	File moved or deleted
Unresolved	Bookmark failed

Use **Repair Link** to reconnect tracks. Pull to refresh to re-validate all links.

4. Playlists

1. Go to **Playlists** tab, tap **+**, enter a name
 - Play All, Shuffle, Add/Remove tracks, Reorder by dragging, Delete
-

5. Playback Sessions

Sessions save your entire playback state: queue, position, EQ, speed, repeat, and shuffle.

- Save from Queue view ... menu > **Save Queue as Session**
 - Load from **Playlists** tab > **Sessions** segment
 - Overwrite, Duplicate, Rename, or Delete sessions
-

6. Bookmarks

Create named bookmarks at any position in a track.

- Tap **Bookmarks** in Now Playing > **Add Bookmark at Current Position**
 - Tap any bookmark to jump to that position
 - Bookmarks persist across sessions and app restarts
-

7. Equalizer

Band	Frequency
1	32 Hz
2	64 Hz
3	125 Hz
4	250 Hz
5	500 Hz
6	1 kHz
7	2 kHz
8	4 kHz

9	8 kHz
10	16 kHz

Adjust each band from **-12 dB** to **+12 dB** in 0.5 dB steps.

12 Built-in Presets

Flat, Rock, Pop, Jazz, Classical, Bass Boost, Treble Boost, Vocal, Electronic, Hip-Hop, Acoustic, Late Night

Custom Presets

Tap **Save Current as Preset**, enter a name. Long-press custom presets to delete.

8. Queue Management

- Queue Source displayed at top
 - Now Playing highlighted, Up Next listed below
 - Drag to reorder, swipe to remove, tap to jump
 - Save queue as Playlist or Session from ... menu
 - Clear Upcoming to remove all future tracks
-

9. Search

- Search by title, artist, album, or genre
 - Continue Listening, Recently Played, Most Played when idle
 - Long-press results for Play Next / Play Later / Add to Queue
-

10. Playback Speed

Speed	Use Case
0.5x	Detailed listening
0.75x	Slightly slowed
1.0x	Normal
1.25x	Slightly faster

1.5x	Fast
1.75x	Very fast
2.0x	Double speed

Pitch is preserved at all speeds. Auto-speed switching available for spoken audio.

11. Sleep Timer

- Presets: 5, 10, 15, 20, 30, 45, 60, 90, 120 minutes
 - Custom timer with hour/minute wheel pickers
 - Visual progress circle, cancel anytime
-

12. Long-Form Audio

- Auto-detects podcasts, audiobooks, lectures
 - Saves resume position automatically
 - Longer skip intervals for spoken content
 - Auto playback speed switching configurable in Settings
-

13. Settings

- **Playback:** Speed, Volume, EQ, Crossfade duration
 - **Long-Form Audio:** Resume threshold, skip intervals, spoken audio speed
 - **Queue:** Restore on launch
 - **Library:** Track count, duration, favorites, import button
 - **File Links:** Health dashboard, refresh all links
 - **Storage:** File mode, legacy usage, remove all
 - **About:** Version, developer, support email, privacy policy, terms of use
-

14. Accessibility & Haptics

- VoiceOver labels on all playback controls
 - EQ sliders support VoiceOver adjustable actions
 - Track rows announce title, artist, duration, and playing state
-

- Haptic feedback: medium on play/pause/next, light on skip/shuffle/repeat, selection tick on EQ
-

15. Supported File Formats

Format	Extensions
MPEG-4 Audio	.m4a
AAC	.aac
MP3	.mp3
FLAC	.flac
WAV	.wav
AIFF	.aiff, .aif
OGG Vorbis	.ogg, .oga
Opus	.opus
Core Audio	.caf
Apple Lossless	.alac

16. Troubleshooting

Track will not play

- Check file availability status for warning badges
- Use Repair Link to reconnect moved files
- Pull to refresh in Library to re-validate links

No sound

- Check Silent Mode, in-app volume, and AirPlay output device

Import not working

- Ensure iCloud files are downloaded, not just cloud placeholders
 - Try Import Folder to select the parent folder
 - Pull to refresh after iCloud syncs
-
